

# Supply Chain Delivery KPIs Dashboard

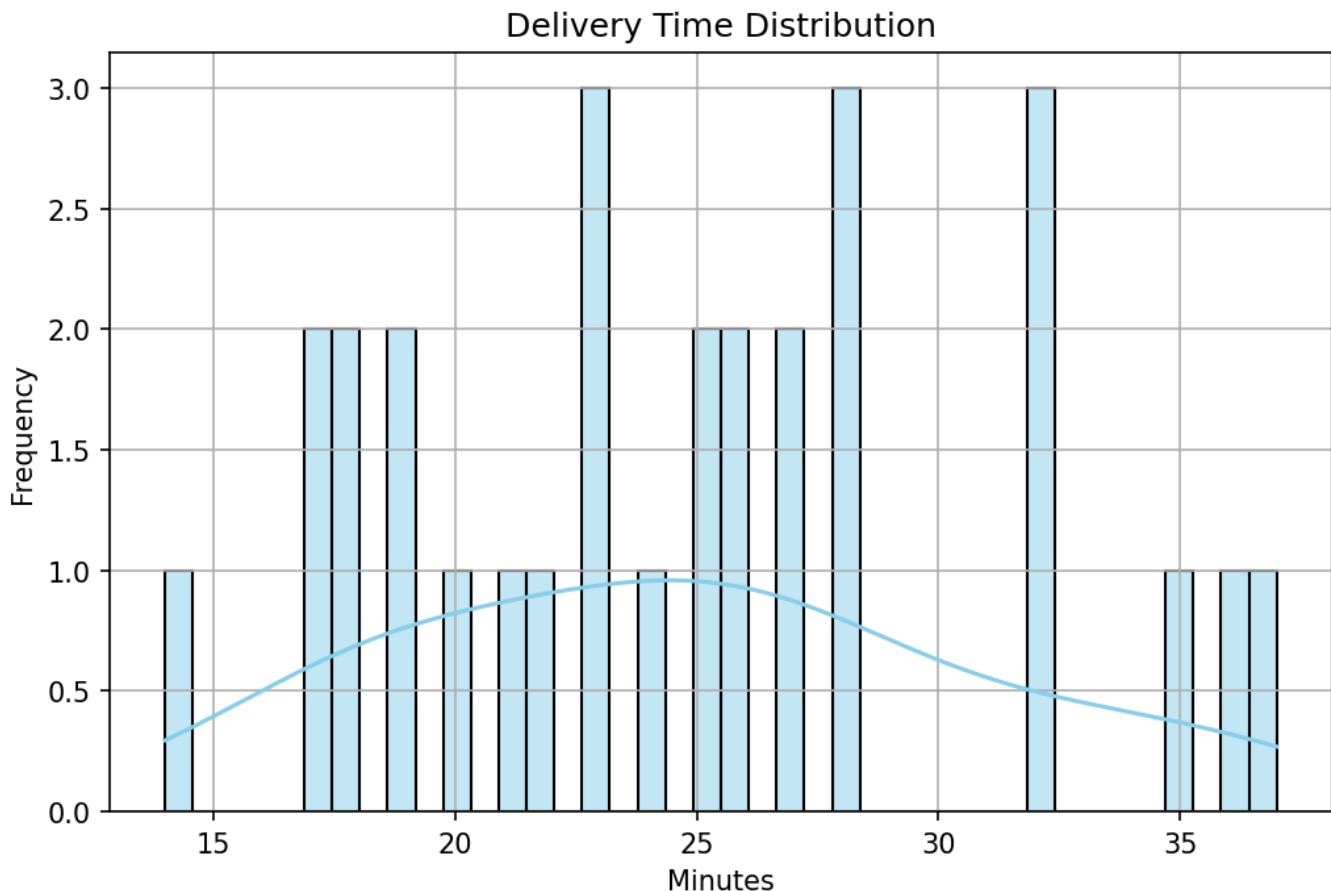

Generated by Prasanth Dadala

Daxwell Data Analyst Project

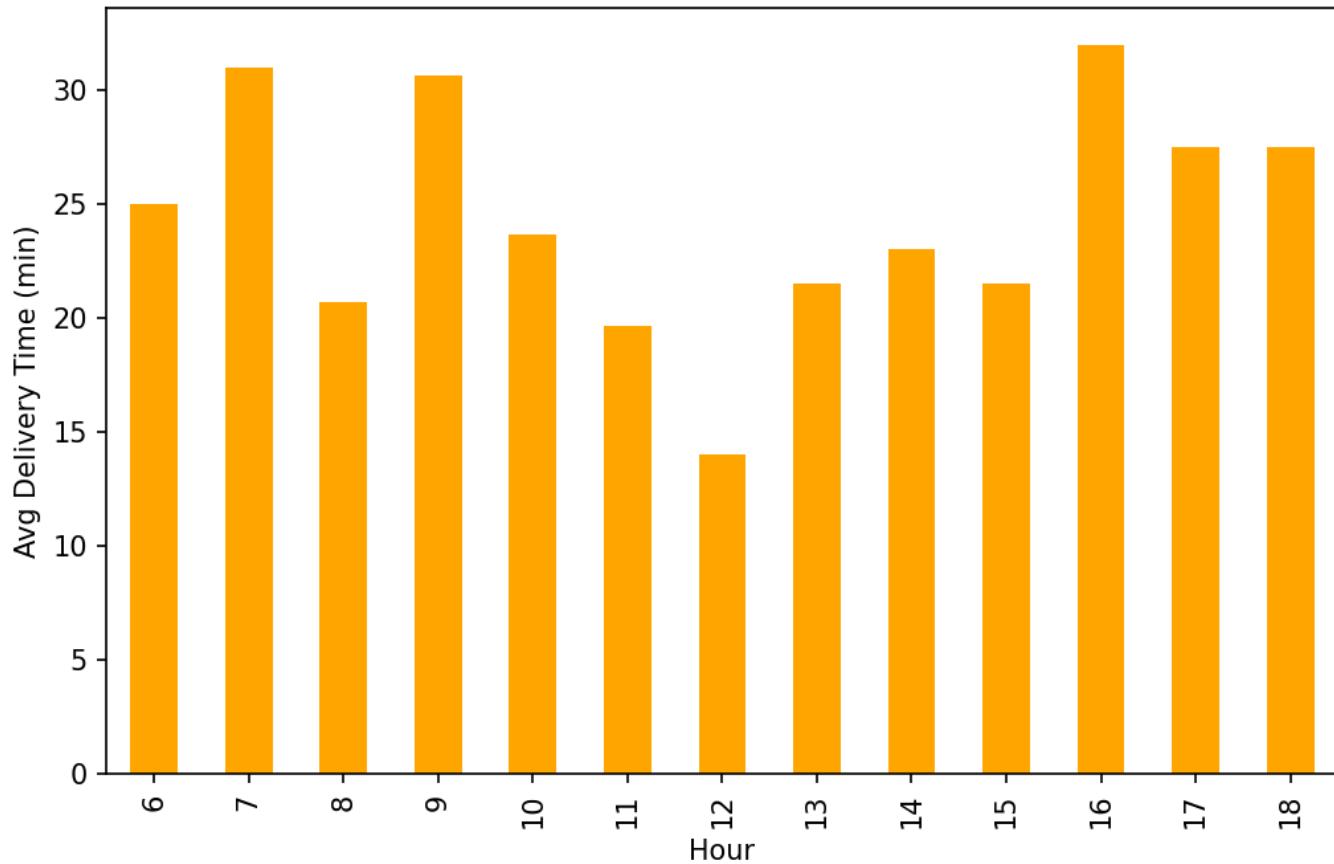

## Key Performance Indicators (KPIs)

- Average Delivery Time: 24.9 minutes
- Median Delivery Time: 25.0 minutes
- % Deliveries During Peak Traffic: 41.4%
- Average Delivery Distance: 3.31 miles

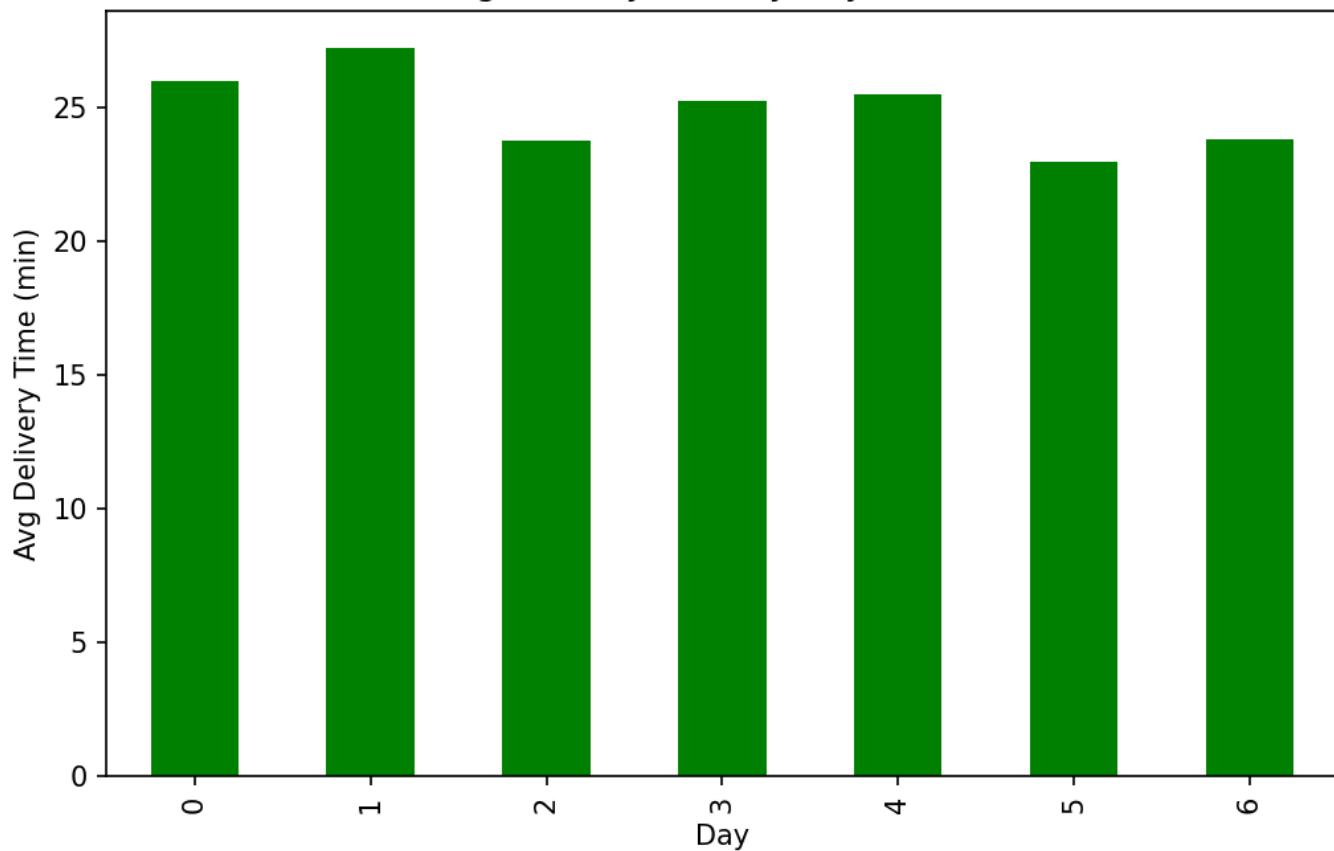

## Visual Insights

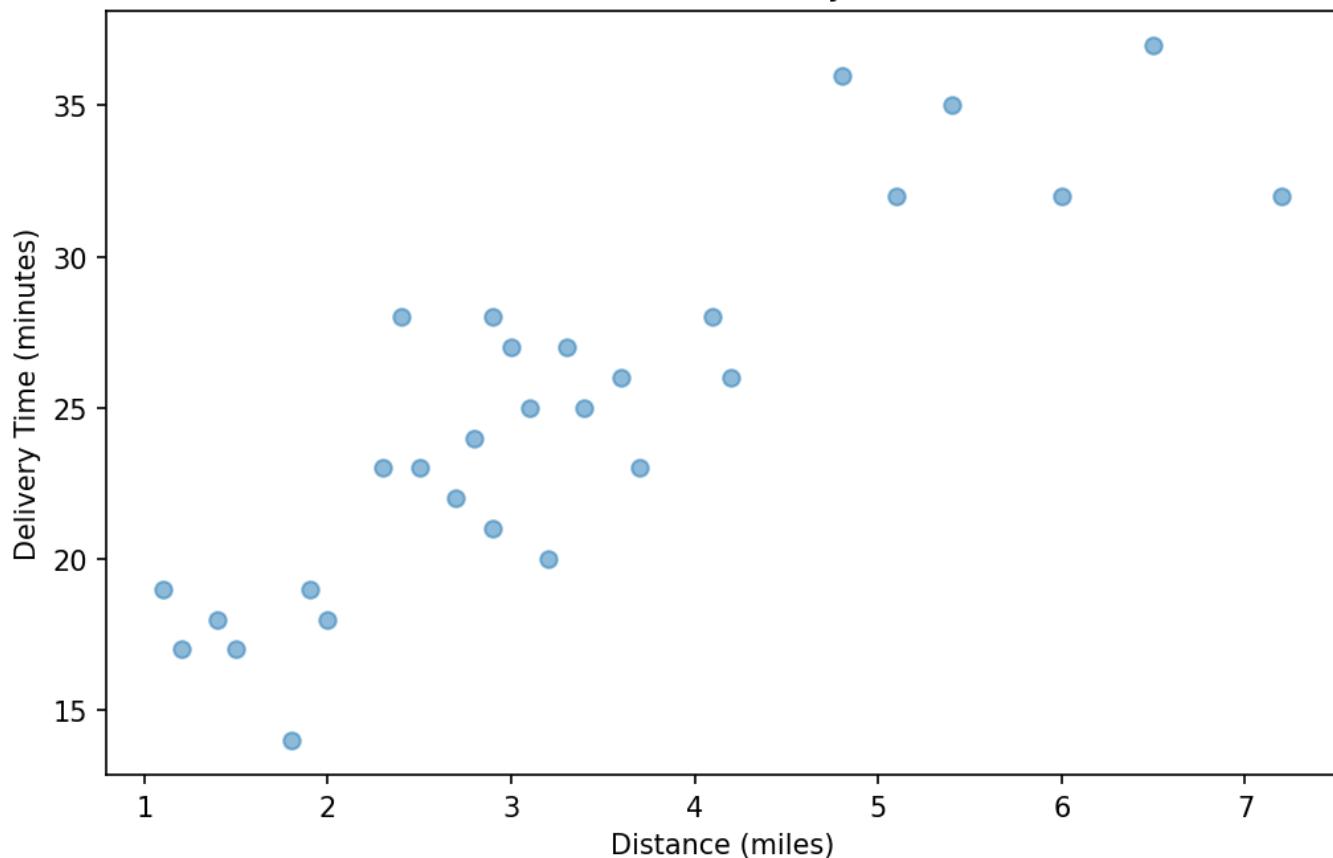

Avg Delivery Time by Hour of Day

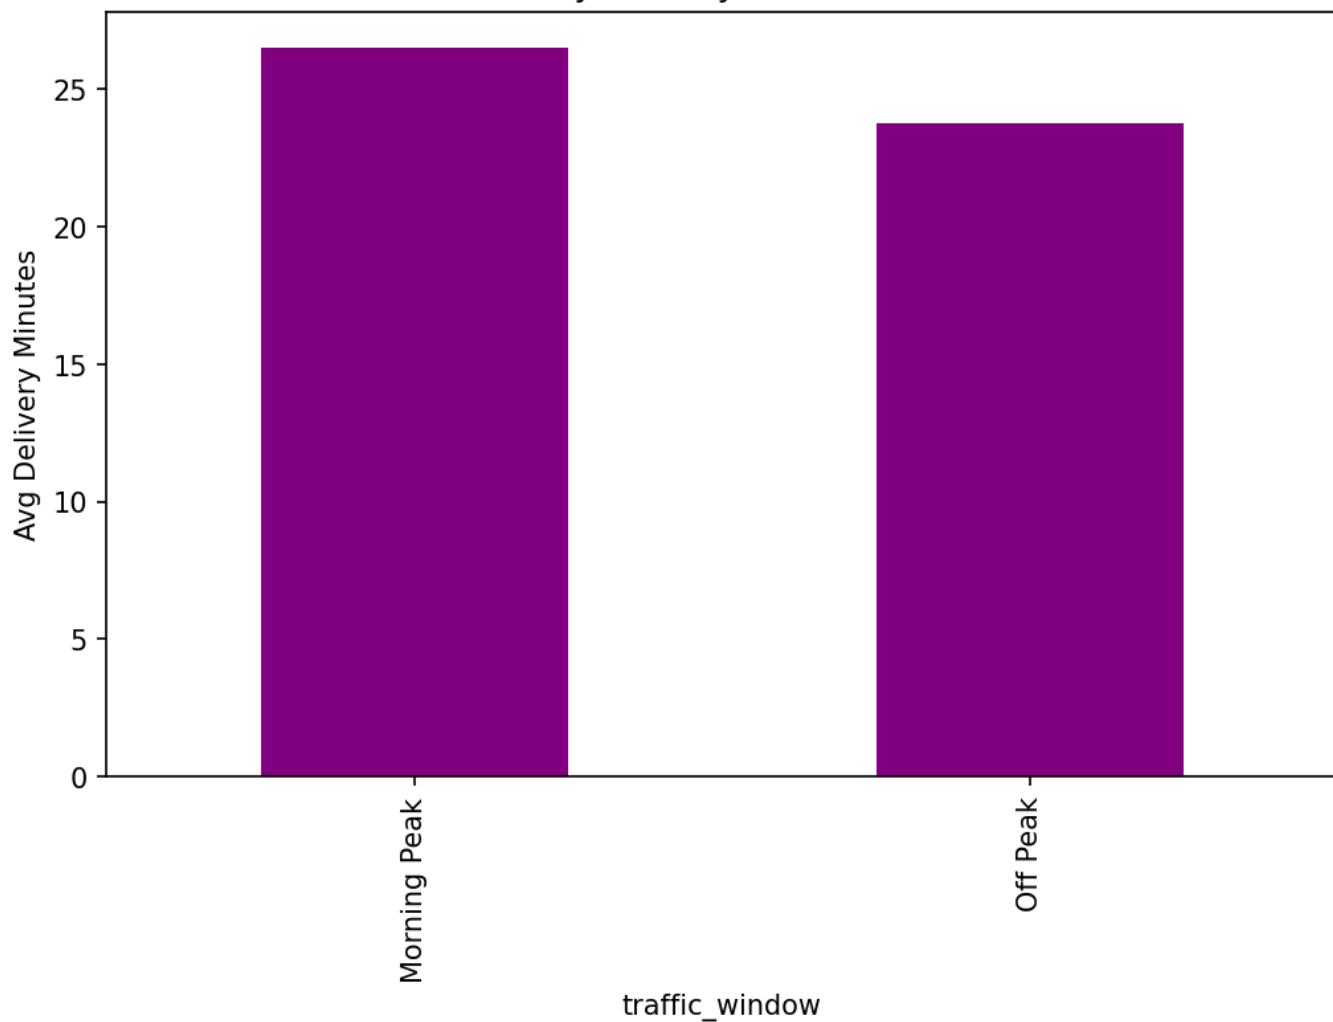

Avg Delivery Time by Day of Week

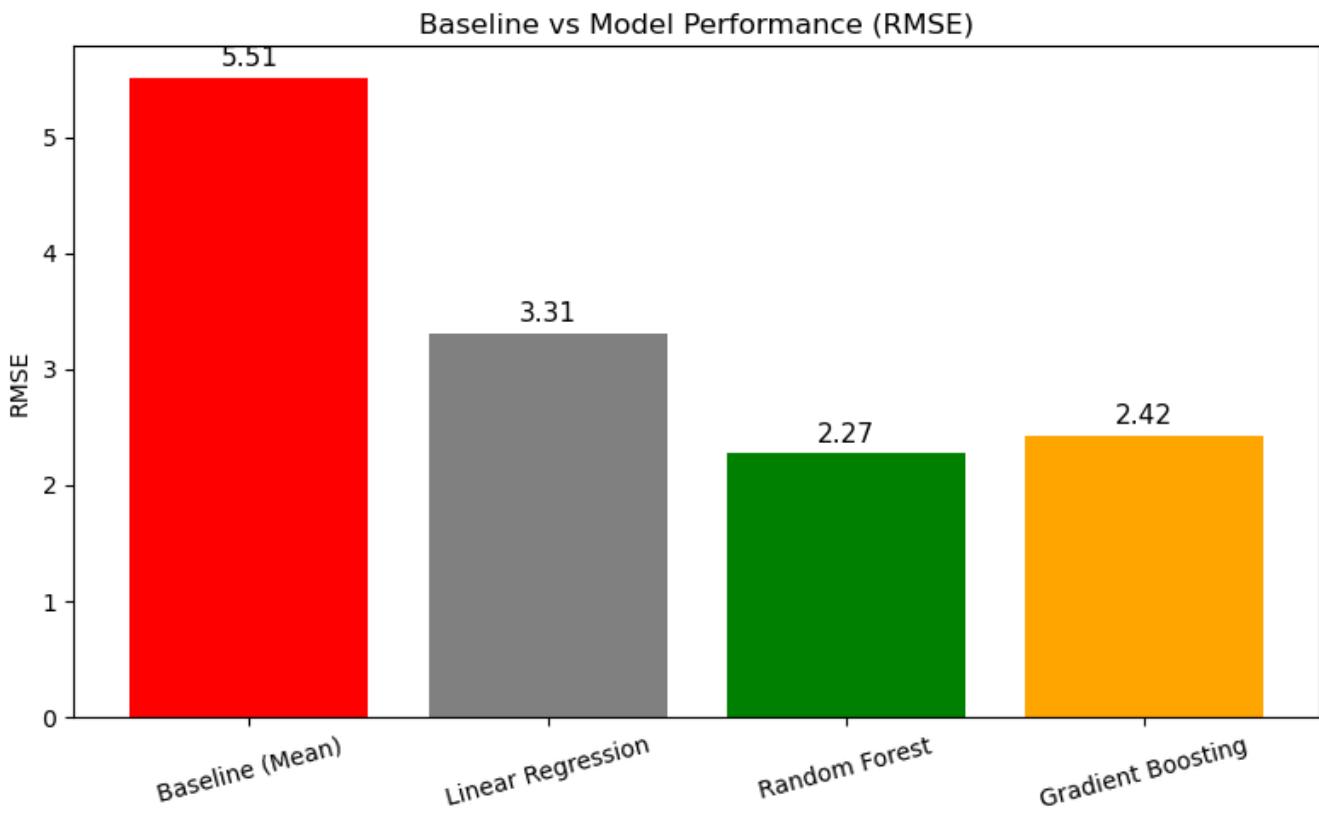

### Distance vs Delivery Time

### Delivery Time by Traffic Window

## Key Operational Insights

1. Distance is the strongest predictor of delivery time.
2. Morning and evening peaks cause the longest delays.
3. Even short-distance deliveries face high congestion delays during rush hours.
4. Random Forest & Gradient Boosting models provide the most accurate ETA predictions.
